SHARED TECHNOLOGIES ANNOUNCES NEW E-ZEE PASS PROMOTION

End User Promotion Provides Unique Investment Protection Opportunity for Legacy Nortel Customers, Including Complimentary Avaya PASS Coverage

COPPELL, TEXAS - JANUARY 25, 2010 – Shared Technologies Inc. (STI) today announced the launch of E-ZEE PASS, an innovative promotion designed to provide an affordable and viable mechanism for protecting and maximizing a customer's legacy Nortel communications infrastructure investment. By committing to at least a 1 year maintenance agreement with Shared Technologies and taking advantage of the E-ZEE PASS promotion, a new customer is provided complimentary PASS coverage from Avaya which guarantees software protection, for the core system, for the length of that maintenance agreement.

In addition, by taking advantage of the E-ZEE PASS program, customers will also receive a variety of value added benefits from Shared Technologies which include one-time up-front discounted pricing on new hardware, software and installation, complete system monitoring capabilities provided by layerX Technologies, disaster recovery software, KtWare (STI's proprietary on-line customer portal), and SYS-View inventory report updates. E-ZEE PASS is a limited time offer, set to expire on June 30, 2010.

“Shared Technologies is very excited to offer such a unique and compelling investment protection opportunity for Nortel customers across the U.S.,” said Glenn Means, Chief Operating Officer for Shared Technologies. “With all the uncertainties Nortel customers have faced over the last 12 months regarding the future lifecycle of their Nortel systems, the E-ZEE PASS program is the perfect solution for providing investment protection packaged with attractive technology refresh opportunities.”
